Introduction

ASX ReferencePoint® is a financial information service providing daily market information from the Australian Security Exchange's single integrated trading platform known as the ASX Trade.

The ASX ReferencePoint® Execution Venue report is a report introduced as part of regulatory changes that took effect on 28 July 2014 necessitating dissemination of trade execution venue details to allow the market to identify on which exchange a trade was executed. This report is a course of sales report transmitted on T+3 at the end of the day cited on the date label. This file contains a subset of the data already available in the current Broker Trades T+3 service, such as Buyer and Seller Broker ID.

The unique information contained in the Execution Venue Report file and not available in any of ASX's other products are as follow:

- ASX Execution/Reporting Venue – refers to ASX Trade execution venue
- External Execution Venue – refers to the venue where trades were executed external to ASX Trade

File Availability, Access, Format and File Name

Availability

ASX ReferencePoint® Execution Venue Report is a daily report usually available from 01:00 hours AEST on T+3. Subscribers should make allowances in their systems for changes in file availability as a result of daylight saving. Such changes are notified to subscribers in ASX Market Information Notices.

Access and Format

ASX ReferencePoint® Execution Venue Report file is available in .CSV format via the subscription-based B2B ASX Online Market Information web portal - <https://www.ASX Online.com/Marketinfo/Login>. Subscribers are issued with a unique password protected login account to access products through this portal. The file is compressed using Zip compression.

ASX offers optional use of a java applet which allows users to automate the downloading of this file, details of which are available here: <https://www.ASX Online.com/marketinfo/help.shtm#a3>

File Name

ASX Online Description	Zip File Name	CSV File Name (contained within the zipped file)
Execution Venue (Zipped)	EVREPORT.ZIP	Execution_Venue_Report.csv

Message Structure

The message has a set format consisting of a specific number of bytes which are divided into fields. This section outlines the ASX ReferencePoint® Execution Venue Report message format.

- Rows 1, 3, 7, 9, 11, 12 & 13 - empty
- Row 2 – contains the date of the report
- Rows 4, 5, 6, 8 & 10 – Disclaimer Section
- Row 14 – Report Header
- Row 15 – data content starts

Field Definitions

The following alphabetical listing of all the Field Definitions referred to in the preceding text provides details of bytes, format, description and valid values.

Please note that for all field definitions:

- All numeric fields are right-justified and zero filled, and have implied decimal places.
- All alphabetic fields are left-justified and blank filled, unless otherwise stated.
- All times disseminated are based on a 24 hour clock.

As At Date	
BYTES:	8
FORMAT:	Numeric YYYYMMDD where YYYY = Year MM = Month DD = Day
DESCRIPTION:	The date on which the trade was executed. ONLY contains a value if different from the date the trade was captured.
VALID VALUES:	N/A

ASX Code																																			
BYTES:	6																																		
FORMAT:	Alphanumeric																																		
DESCRIPTION:	<p>A code allocated to identify securities and derivative products.</p> <p>Equities, Convertible Notes and Company Options:</p> <p>The first three characters (Issuer Code) are a code assigned to the issuing body, and the last three characters (Security Code) are a code allocated to each security pertaining to an issuing body. In the case of ordinary shares, the last three characters are generally blank filled.</p> <p>In relation to equity security codes, a period of 10 years needs to have elapsed before a given code may be reused.</p> <p>Interest Rate Securities:</p> <p>The first three characters refer to the underlying security. The fourth character H indicates interest rate security, the fifth character is an alpha character - from A to Z, and the sixth character may be "empty/blank" or an alpha character - from A to Z.</p> <p>For Exchange-traded Australian Government Bonds (AGBs), the following coding convention applies:</p> <table> <tr> <td>First Two Characters</td><td>GS</td></tr> <tr> <td>3rd Character</td><td>B for Fixed coupon, I for Indexed</td></tr> <tr> <td>4th Character</td><td>month of maturity</td></tr> <tr> <td></td><td>Values:</td></tr> <tr> <td></td><td>A or B for January</td></tr> <tr> <td></td><td>C or D for February</td></tr> <tr> <td></td><td>E or F for March</td></tr> <tr> <td></td><td>G or H for April</td></tr> <tr> <td></td><td>I or J for May</td></tr> <tr> <td></td><td>K or L for June</td></tr> <tr> <td></td><td>M or N for July</td></tr> <tr> <td></td><td>O or P for August</td></tr> <tr> <td></td><td>Q or R for September</td></tr> <tr> <td></td><td>S or T for October</td></tr> <tr> <td></td><td>U or V for November</td></tr> <tr> <td></td><td>W or X for December</td></tr> <tr> <td>5th & 6th Characters</td><td>year of maturity (i.e. 2014 will be represented as 14)</td></tr> </table>	First Two Characters	GS	3 rd Character	B for Fixed coupon, I for Indexed	4 th Character	month of maturity		Values:		A or B for January		C or D for February		E or F for March		G or H for April		I or J for May		K or L for June		M or N for July		O or P for August		Q or R for September		S or T for October		U or V for November		W or X for December	5 th & 6 th Characters	year of maturity (i.e. 2014 will be represented as 14)
First Two Characters	GS																																		
3 rd Character	B for Fixed coupon, I for Indexed																																		
4 th Character	month of maturity																																		
	Values:																																		
	A or B for January																																		
	C or D for February																																		
	E or F for March																																		
	G or H for April																																		
	I or J for May																																		
	K or L for June																																		
	M or N for July																																		
	O or P for August																																		
	Q or R for September																																		
	S or T for October																																		
	U or V for November																																		
	W or X for December																																		
5 th & 6 th Characters	year of maturity (i.e. 2014 will be represented as 14)																																		

For Corporate Bond CDIs, the following coding convention applies:

First three Characters	Issuer Code
4 th & 5 th Characters	Year of maturity (2017 will be represented as 17)
6 th Character	month of maturity (i.e. "A" or "B" represents January, "C" or "D" represents February, etc...)

Exchange Traded Options:

The first three characters refer to the underlying security. The fourth and fifth characters used in the coding of each strike of an option series are randomly generated. The sixth character will be the numeral 7, 8 or 9.

ASX Futures Contracts:

The first three characters refer to the underlying security. The fourth and fifth characters are an identifier for the expiry / maturity of the contract.

Warrants:

The first three characters refer to the underlying security; the fourth character signifying a warrant group may be a 'W', 'V', 'U', 'T', 'I', 'J', 'S', 'E', 'X', 'Y', 'Z', 'D', 'K', 'L', 'M'; 'F' or 'Q' the fifth character indicates the warrant issuer; and the sixth character identifies the warrant series.

Warrant Group	Description
W, V, U or T	Trading style warrants including equity calls and puts, index calls and puts, currency calls and puts.
I or J	Instalments
S	Self Funding Instalments (SFIs) and Structured Investment Products (SIPs – these include longer-term investment style products).
E	Endowments
X, Y or Z	Warrants which have significantly different structures to any of the above. Examples include equity and index knock-out warrants and Capital Plus Warrants.
D	This is a temporary code assigned to a warrant trading on a deferred settlement basis. The warrant will revert to its original code on the first day of normal trading after deferred settlement ends.
K or Q	MINIs
L	Guaranteed Stop Loss (GSL) MINIs
M	Listed Protected Loan
F	New Product Types

In relation to warrant codes, there is no standard time frame for reusing codes that have previously been allocated to securities. This means that a given ASX warrant code may be reused within a period of 2 months.

ASX Book Build:

[ASX Ticker Code][identifier][BB]

The identifier is X by default, but moves down the alphabet depending on whether or not the same ASX BookBuild security code has recently been used by the BookBuild Issuer. It is therefore possible to have Y, Z or another letter of the alphabet as identifiers. The security description contains the word "BookBuild".

Un-sponsored Depositary Receipts (UDRs)

UDRS will have four (4) characters ASX/Trading Code; the first 3 characters do not reference the issuing body.

The first character of the ASX/Trading code will be "U" signifying it is a UDR.

The 2nd to 4th characters of the code reference the underlying stock on the home exchange.

VALID VALUES: N/A

Basis of Quotation

BYTES: 2, occurs 5 times

FORMAT: Alphabetic

DESCRIPTION: Indicates the status under which a Security is quoted. In the case of trades, this field will only contain a value if special permission has been granted by the respective committees to trade outside the current stated Basis of Quotation.

Note: Standard trading incorporates a fixed settlement period of three business days (T+3).

VALID VALUES:	Code	Description	Code	Description

Buyer Identification

BYTES: 4

FORMAT: Numeric

DESCRIPTION: A four-digit number to identify the buying Trading Participant.

VALID VALUES: N/A

Trade Condition Codes

BYTES: 2, occurs 8 times

FORMAT: Alphabetic

DESCRIPTION: Two-character code indicating the condition(s) under which the sale was effected.

VALID VALUES: See the [Condition Code Table](#)

ASX Execution/Reporting Venue

BYTES:	4
FORMAT:	Alphanumeric
DESCRIPTION:	Unique code [registered ISO 10383 Market Identification Code (MIC)] identifying the ASX Trade market segment on which the transaction was executed/reported.
VALID VALUES:	ASXT ASX TradeMatch® ASXC ASX CentrePoint® ASXP ASX PureMatch®

External Execution Venue

BYTES:	4
FORMAT:	Alphanumeric
DESCRIPTION:	Unique code [registered ISO 10383 Market Identification Code (MIC) or code assigned by ASIC] identifying the Crossing System or other facility external to ASX on which the transaction was executed where specified by a Trading Participant when submitting a Trade Report to ASX.
VALID VALUES:	Use below URL to ASIC website for up to date list of registered crossing systems. http://www.asic.gov.au/asic/ASIC.NSF/byHeadline/List-of-crossing-systems-registered-with-ASIC

Original Trade Capture Date

BYTES:	8
FORMAT:	Numeric YYYYMMDD where YYYY = Year MM = Month DD = Day
DESCRIPTION:	The date on which the trade to be cancelled was originally reported.
VALID VALUES:	N/A

Reversal Reason Code	
BYTES:	1
FORMAT:	Alphabetic
DESCRIPTION:	A code or indicator allowing the identification of incorrect data which caused the reversal of a trade.
VALID VALUES:	B = Incorrect Broker P = Incorrect Price S = Incorrect ASX Code V = Incorrect Volume O = Omitted D = Data Entry Error

Sale Price / Sale Contract Price	
BYTES:	9
FORMAT:	Numeric (Expressed as cents to four decimal places or where applicable, expressed as index points) For Security Types 11, 12, 33, 34, 35 , 48, 49, 57, 58 , 85, 87 and 90 to 97 (high denomination equities and warrants & structured products, options and LEPO"s), the Price is expressed as dollars and cents to four decimal places. <hr/> Numeric 9(7) v 9(2) For Security Types 39, 52, 59 & 65 (Ultra High Denomination securities), the Price is expressed as dollars and cents to two decimal places.
DESCRIPTION:	The price at which a trade/contract was reported or executed.
VALID VALUES:	N/A

Sale Value	
BYTES:	12
FORMAT:	Numeric (Expressed as dollars and cent to two decimal places.)
DESCRIPTION:	The total cost in AU dollars of the sale transaction.
VALID VALUES:	N/A

Sale Volume	
BYTES:	9
FORMAT:	Numeric
DESCRIPTION:	The number of units (i.e. shares, contracts) transacted.
VALID VALUES:	N/A

Security Type	
BYTES:	2
FORMAT:	Numeric
DESCRIPTION:	The type of Security as defined by the issuing body.
VALID VALUES:	See the Security Type Table

Trade Slip Number	
BYTES:	10
FORMAT:	Numeric
DESCRIPTION:	<p>Consists of the Serial Trade Qualifier + Trade Serial Number identifying a trade.</p> <p>Serial Trade Qualifier is a four-digit identifier to aid in the identification of transactions. This is the first 4 digits of the 10 digit Trade Slip Number (TSN) generated by the ASX trading system. Below is the full breakdown of the TSN:</p> <p>ASX Trade Slip Number format is 10PNNNNNNN where:</p> <p>1: always 1</p> <p>0: last digit of the Ordinal date</p> <p>P: instance number of DC (Deal Capture)</p> <p>NNNNNNN: Trade Number</p> <p>Trade Serial Number is a six digit serial number generated by ASX trading system to identify a transaction. this is the last 6 digits of the 10 digit Trade slip Number (TSN) generated by the ASX trading system. Below is the full breakdown of the TSN:</p> <p>ASX Trade Slip Number format is 10PNNNNNNN where:</p> <p>1: always 1</p> <p>0: last digit of the Ordinal date</p> <p>P: instance number of DC (Deal Capture)</p> <p>NNNNNNN: Trade Number</p> <p>The characters underlined and in bold font represent that part of the TSN that populates the Trade Serial Number data field.</p>
VALID VALUES:	N/A

Seller Identification	
BYTES:	4
FORMAT:	Numeric
DESCRIPTION:	A four-digit number used to identify the selling Trade Participant.
VALID VALUES:	N/A

Time	
BYTES:	6
FORMAT:	Numeric HHMMSS where HH = Hours MM = Minutes SS = Seconds
DESCRIPTION:	<p>The time that the record was entered into the computer system to be disseminated.</p> <p>The following 'Time' field changes on the Trade, Quote and Snapshot messages apply after the Integrated Trading System (ITS), now referred to as ASX Trade, was implemented in 2006. Different definitions apply to this field depending on the message type. These other 'Time' definitions are detailed below.</p> <p>Trade / Trade Cancellation Time: this refers to the actual time of the trade or trade cancellation.</p> <p>Trade messages are time-stamped with the time the trade was executed on the trading system.</p> <p>Quote Capture Time: this refers to the time the ASX central system captured the quote message.</p> <p>Quote messages are time-stamped with the quote capture time of ASX's central repository system.</p> <p>Snapshot Dissemination Time: this refers to the time of snapshot dissemination.</p> <p>Snapshot messages are time-stamped with the snapshot dissemination time.</p>
VALID VALUES:	N/A
Trade Date	
BYTES:	8
FORMAT:	Numeric YYYYMMDD where YYYY = Century, Year MM = Month DD = Day
DESCRIPTION:	<p>A date reflecting the trade capture date.</p> <p>The time the trade was executed/reported to the trading system. For trade cancellations, the actual time of the trade cancellation.</p>
VALID VALUES:	N/A

General Information

This section provides general information applicable to the various messages.

Basis of Quotation

Generally securities trade on a 'cum' basis. However, under certain circumstances, special markets may be created on a daily basis, which trade outside the 'normal' market and in addition to the normal market.

To identify trades that have occurred as a result of a special market, a subscriber should interrogate the basis of quotation and special market indicator fields. Trades which occur in a normal market do not contain any values in the basis of quotation field and contain a value of 'N' in the special market indicator field, regardless of whether it is an 'ex' or a 'cum' market. Trades that occur as the result of a special market, have one or more values in the basis of quotation field. Refer to 'Basis of Quotation' field definition for the relevant valid values.

For example, if the normal market for XYZ is ex-dividend, then the basis of quotation field is blank filled. If a 'cum' dividend special market is established, any trades executed in this special market will contain 'CD' in the basis of quotation field.

A special market may be established for a security that has more than one basis of quotation. For example, a cum dividend (CD), cum rights (CR) special market may be established for XYZ. Any trades executed in this special market would have 'CD' and 'CR' in the basis of quotation field.

Any trade that contains a value other than spaces in the basis of quotation field should not update the first, high, low or last fields. These are considered off market trades, and thus only update the cumulative volume and cumulative value fields.

Access via ASX Online

System Introduction

ASX Online is an innovative extranet site from ASX, developed to meet your needs by providing information efficiently and cost effectively.

The site offers subscribers fast access to products and information while maintaining security through unique user names and passwords. ASX Online has been specifically designed to be flexible and easy to use. You will find the navigation bar takes you quickly to the information you need.

Access and Availability

The ASX Online site has a scheduled availability of 12:00am Monday – 12:00pm Saturday, Australian Eastern Standard Time, with a maximum downtime of 15 minutes in this period.

Website Details

The ASX Online site has a unique URL: <https://www.asxonline.com/mia/>

Security Identification

Security Identification is defined by a unique combination of a user name and password. The only means of gaining a user name and password for the ASX Online site is from the ASX Information Services Contracts & Subscriptions Coordinator.

Prior to receiving a user name and password, the Subscriber must have signed and returned two original copies of the Subscription Agreement. The user name and password will be sent by way of a personally addressed letter.

It is the Subscriber's responsibility to protect the confidentiality of the Security Identification and prevent its unauthorised use or distribution. If the confidentiality of the Security Identification is compromised, the Subscriber must notify the ASX Information Services Contracts & Subscriptions Coordinator in writing immediately and a new Security Identification will be issued. The compromised Security Identification will be cancelled on receipt of the above written notice.

ASX may also cancel or suspend a Subscriber's Security Identification where misuse or abuse of access to the ASX Online site has been identified. In this instance, ASX will notify the Subscriber in writing.

Resources

Guidance about automated ways of accessing data from ASX Online is available via the following resources:

- Customers seeking to automate file download via their own preferred mechanism: <https://ASX Online.com/content/ASX Online/public/documents/market-information-application--mia----rest-programmatic-interfa.html>
- Customers seeking to use the ASX developed java application: <https://ASX Online.com/content/ASX Online/public/documents/market-information-application--mia----java-downloader-guide.html>
