ASX Austraclear File Deployment Guide – ANNI

1 Prerequisites

- **Software installation completed**. Please ensure that you have successfully completed the installation of the ASX Austraclear system as documented in the Software Installation Guide before proceeding with logging in to the new system.

- **Digital Certificate Enrolment completed.** A client side digital certificate is required to be downloaded and installed prior to logging into the ASX Austraclear system.

  Please follow the instructions provided in the Digital Certificate User Enrolment Guide which is published on the ASX Austraclear website, http://www.asx.com.au/professionals/asx-austraclear-technical-documents.htm under Login & Authentication
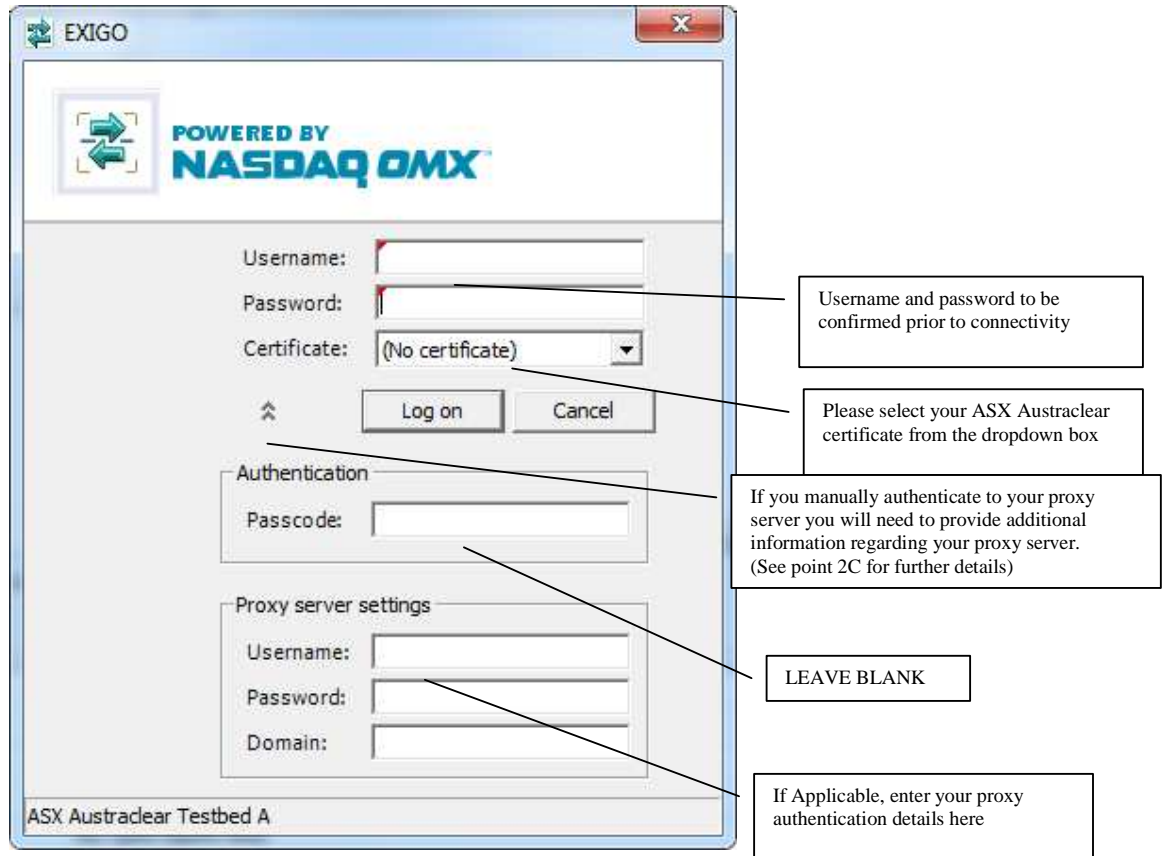

2 File Deployment Procedures

1) **Log into the application**

   To launch the ASX Austraclear Application either:

   - Click on the desktop shortcut (if you have created one) OR;
   - Launch the ASX Austraclear System (EXIGO CSD) via the Start Menu:
     START->Programs->EXIGO CSD->**EXIGO CSD…**

2) You will now be presented with the EXIGO CSD Login Dialog box

A) Username and Password

Enter Username and Password, as provided for access to the system.

Username _____

Password _____ (Note that the password is case sensitive)

B) Digital Certificates

Please select your ASX Austraclear Digital Certificate from the drop-down box.

C) Proxy Server Details – Manual Authentication

If your access to the ASX Austraclear is via a proxy that requires you to manually authenticate, this information will need to be entered. Please contact your Administrator for further details.

Proxy server username _____

Proxy server password _____

Proxy server domain _____

Press Log on after completing all the requirements above.

Please note, Exigo does NOT support Automatic Proxy Configuration Script. Please ensure that this functionality is disabled in your proxy settings:

This setting can be found on the following menu in internet explorer:

Tools→ Internet Options → Connections → LAN Settings

3) **The following GUI menu bar will appear**.
3   Next Step

Once you have successfully logged into the ASX Austraclear system, please refer back to your ANNI Industry Wide Test Environment User Guide for further instructions.

** If you cannot view these pages check the following troubleshooting steps on the next page:

Note. Perform tests on this page ONLY if you cannot view the webpage. If either of the following tests fail please contact your systems administrator.

For Exigo Production Environment:

Execute a command prompt session:

Start→ run → (type) cmd

Type:

Via DNS
nslookup 203.4.179.50
Via Host or static DNS
Nslookup 203.4.179.224

The output should be as follows:

Name: asx.austraclear.com.au
Address: 203.4.179.50 (via DNS) or 203.4.179.224(via host file)

Ping the following address:
Type:

ping asx.austraclear.com.au

The output should be as follows:(DNS)

Pinging exigo.austraclear.com.au [203.4.179.50] with 32 bytes of data:

Reply from 203.4.179.50: bytes=32 time=2ms TTL=124
Reply from 203. 4.179.50: bytes=32 time=2ms TTL=124

The output should be as follows:(Host)

Pinging exigo.austraclear.com.au [203.4.179.224] with 32 bytes of data:

Reply from 203.4.179.224: bytes=32 time=2ms TTL=124
Reply from 203.4.179.224: bytes=32 time=2ms TTL=124
